

Walk Through Metal Detectors

Securitas Walk-Through Metal Detectors are multi zone, 18 horizontal & vertical zones of detection and multi-dimensional coil design (transmission & reception in a single group).

The unit constantly performs self diagnostics throughout its operation.

Computerized access codes render settings tamper-proof, auto sensitivity for easy calibration, easy programming and monitoring with LCD display.

- ❖ The system is compact and easy-to-assemble, but includes full installation and commissioning.
- ❖ Securitas can maintain system throughout lifespan
